

KLove 90.7 fm serves to benefit me as a radio listener. Every day I look forward to turning this station on. I can have anyone around me listening to this station and I don't have to be embarrassed, even if they're young ears. The local community would be missing a very positive station that does national news and programming that I would miss, if this law were to be passed. KLove is in the public interest to remain on the air because it supports many people's beliefs and interests in musical taste and quality in the positive sense. Please consider my comments because I have supported this station financially and I would be losing out on an important part of my daily life. Thank you for taking the time to read.
